- Graduation
WBSU
Completed in 2022
- Higher Secondary
W.B.C.H.S.E
Completed in 2019
- 10th Standard
W.B.B.S.E
Completed in 2017

About Me

As a Laravel developer with over 4 years of experience, I have gained a deep understanding and expertise in developing web applications using the Laravel framework. Throughout my career, I have successfully delivered projects of varying complexities, ranging from small-scale websites to large enterprise-level applications. I am proficient in designing and developing RESTful APIs, ensuring seamless integration with other systems and applications. I am well-versed in front-end technologies like HTML, CSS, and JavaScript, jquery. In addition to my technical skills, I am a strong problem solver and have a keen eye for detail. I am experienced in working collaboratively with cross-functional teams, including designers, UX/UI experts, and project managers, to ensure the successful implementation of projects while meeting deadlines. Along with laravel i have 1years+ experience in node js api development.

Major Projects

TCB PORTAL – Worked as a backend developer in a that project focused on building APIs for the frontend, my role was to design, develop, and maintain the backend infrastructure and database design that powers the communication between the frontend and the server.

INDUSTRIAL INFORMATION SYSTEM (BHUTAN) – Worked as a full stack developer on that project where my responsibilities included both front-end and back-end development. On the front-end, I utilized HTML, CSS, Bootstrap and JavaScript to build the user interface and ensure a seamless user experience. On the back-end, I used Laravel to develop the server-side logic and APIs. I designed and implemented RESTful APIs to handle data requests from the front-end and interact with the database.

CIMS (BHUTAN) – Worked as a Laravel developer on that project where my responsibilities included developing and maintaining the server-side logic of the web application and designing and optimizing the database structure.

Astroaquila – A ecommerce platform where I worked as full stack developer . My responsibilities included developing and implementing backend functionalities, database management , api development , integration with third-party services and performance optimization.

Area of expertise :

- Ecommerce Development
- CMS Development
- Accounting Web Application Development
- CRM Development
- Job Portal
